USING A MICROSCOPE

BLM G-2

Goal • BECOME MORE FAMILIAR WITH THE USE OF A MICROSCOPE.

What to Do

- Identify the labelled parts of the microscope below, then respond to the activities that follow. Refer to pages 10-13 in *SciencePowerTM 8* if you need help.
- This microscope had separate labels for each of the objective lenses so be sure to specify their magnification (**low**, **medium**, and **high**).
- **Stage clips** are labelled on this diagram but not in the textbook. Can you find them?
